

Ayesa Taiyeeba Apa

Sr. Software Quality Assurance Engineer

+8801746629998 ayesa.apa@gmail.com https://linkedin.com/in/ayesa-apa/ Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Detail-oriented Senior Software Quality Assurance Engineer with 3+ years of experience in Manual, Automation, and API Testing across ERP, SMS Gateway, and AI/ML-driven IoT platforms. Skilled in designing test strategies and executing functional, regression, performance, integration, and security testing within Agile/Scrum environments. Passionate about applying automation frameworks and CI/CD practices to improve release quality and reduce defect leakage. Seeking to leverage proven QA expertise and a strong grasp of emerging AI/ML testing challenges to drive continuous quality improvement in a growth-focused engineering team

EXPERIENCE

Sr. Software QA Engineer

SSL Wireless 01/2026 - Present

- Managed end-to-end quality assurance activities for **Fin-Tech**, **ERP**, **SMS Gateway**, and **AI/ML**-driven **IoT** systems.
- Collaborated with **cross-functional teams** to ensure integration and alignment with business and regulatory standards.
- Executed **Functional**, **Non-functional**, **API**, **Performance**, **Regression**, **Integration**, **Database**, and **Security** testing.
- Reviewed **requirements**, **specifications**, and **technical design documents** for clarity and completeness.

Software Quality Assurance Engineer

SSL Wireless 01/2025 - 01/2026

- Conducted manual and automated testing for CGL (**ERP**), iSMS Plus (**SMS Gateway**), and **ML/IoT**-based Security Surveillance Systems.
- Developed and executed test plans, test cases, and API tests (**Postman**, **SOAP UI**).
- Worked in **Agile teams**, tracked bugs in **JIRA**, and supported continuous QA process improvement.
- Ensured software quality through **functional**, **regression**, and system **integration testing**.

Associate SQA Engineer

SSL Wireless 02/2024 - 01/2025

- Developed and executed **test plans/cases** for web and mobile applications using JIRA
- Performed manual and automation testing for IoT/AI-ML applications
- Ensured software quality through comprehensive testing **strategies**.

SQA Engineer Intern

SSL Wireless 10/2023 - 02/2024

- Conducted manual testing: functional, regression, and integration.
- Gained experience in Agile methodologies and test automation.

Software Engineer Intern

Kodeeo 01/2021 - 08/2021 Dhaka, Bangladesh

EDUCATION

B.Sc. in Computer Science and Engineering
International University of Business Agriculture and Technology

Higher Secondary School Certificate, Science
Galachipa Government College
01/2011 - 12/2013

Secondary School Certificate, Science
Galachipa Model Secondary School
01/2006 - 12/2011

TECHNICAL SKILLS

Programming

C C++ Java PHP Shell Script

Testing

Manual / Automation Selenium JMeter

Postman SOAP UI SOAP UI

Usability & Compatibility UAT

Security Testing AI Automation Testing

Methodologies

Agile Scrum SDLC STLC

Databases

MySQL RDBMS SQL NoSQL

Specialized

Fin-Tech IoT Testing AI/ML Testing

ERP AI/ML Testing Mobile App Testing

Automation Frameworks

TestNG Cucumber Appium

Playwright Cypress

API Testing Tools

Postman Swagger Newman

CI/CD & Version Control

Jenkins Git/GitHub/GitLab

Test Management & Bug Tracking

JIRA TestRail Confluence GitLab

PROJECTS

CGL OIL-OTL ERP

Garments ERP application covering order processing, inventory management, production tracking, and shipment handling.

- Validated end-to-end ERP workflows to ensure accurate order-to-shipment tracking across production and inventory modules.
- Executed functional and regression test cycles across order processing, inventory, and production tracking modules.
- Collaborated with development and business teams to resolve defects and align system behavior with garments industry workflows.

Guard Attendance System

Security attendance system supporting punch in/out, roster scheduling, and real-time attendance log validation

- Security attendance system supporting punch in/out, roster scheduling, and real-time attendance log validation
- Tested facial recognition accuracy and response handling to support dependable real-time security alerts.
- Conducted functional and performance testing of facial recognition matching under varying network and load conditions.

Multiple Face Recognition

AI-powered attendance system using deep learning-based facial recognition

- Ensured recognition reliability across varied lighting, angles, and pose conditions through targeted test scenarios.
- Tested model accuracy across diverse datasets to help reduce false positive/negative recognition rates.
- Validated attendance log generation and reporting based on recognition results.

IVR System

Automated call routing system integrating NLP and CRM data for customer interactions

- Validated NLP-driven call routing accuracy and CRM data integration to streamline customer call handling.
- Tested call flow scenarios including menu navigation, fallback routing, and error handling.
- Verified CRM data synchronization to ensure accurate customer record updates after each call.

iSMS & Auto Purchase

SaaS-based SMS Gateway and Auto Purchase platform enabling automated messaging and procurement workflows.

- Executed functional and regression testing across SMS gateway messaging and auto purchase workflows.
- Verified SaaS multi-tenant behavior and data isolation across client accounts.
- Tested API integrations and message delivery reliability under varying load conditions.

LMS & Credit Scoring

Loan Management System with integrated eKYC and credit scoring for automated loan processing.

- Conducted automation testing for loan origination, eKYC verification, and credit scoring workflows.
- Performed requirement analysis to translate business rules into structured test scenarios.
- Validated credit scoring accuracy and eKYC document verification against defined business rules.

Ebuddy & KPI Management

Employee Management System featuring an AI-driven brain for task management, voice input, CRM, and KPI/project tracking across Web and App.

- Tested AI-driven task management and voice input features across Web and App platforms.
- Verified CRM integration and KPI/performance tracking modules for accurate reporting.
- Executed cross-platform functional and integration testing to ensure consistent employee and project management workflows.

OTHER NOTABLE PROJECTS

ACI Motor Service Center Automation, SSLCommerz-eKYC, SSL SDK, Virtual Recharge, Easy Corporate, Voice Portal, HSBC-Titas Gas.

KEY ACHIEVEMENTS

Issue Resolution Excellence

Achieved 99.5% issue resolution rate by implementing rigorous quality checks for IoT projects.

Enhanced Script Efficiency

Boosted test automation efficiency by 40% through innovative script optimization.

Project Leadership Success

Led three projects, reducing time-to-market by 20% with improved testing processes.

Collaboration Enhancement

Improved collaboration with cross-functional teams, resulting in 30% faster test cycle completion.

CERTIFICATIONS

SQA and Cyber Security Course
